THESDAY, Nov. 26. . P. M. The Stock Market was heavy to-day for the fancies, and most of the quotations were lower. Morris and Eric fell off somewhat. At the Second Board, however, there was a better feeling, and prices improved. Delaware and Hudson went to 157. Erie Income Bonds were active, and some \$80,000 sold, closing at 93. The other improved 1 \$\P\$ cent. Reading was dull, and Portsmouth fell off | P cent. Norwich and Worcester | legal rate of discount. was steady. The projected road from New Haven eastwardly through Saybrook, to connect with the Nerwich Road, promises to add largely to the traffic of that Road. It is called the New Haven and New London Road, but it is by no means settled that it will terminate at New London. That City has subscribed \$100,000 to the stock, but the City of Norwich will do the same thing provided Norwich is made the terminus. A survey is now being made from Saybrook taking the direct route to Norwich, instead of making a detour to New London, the distance between New Haven and Norwich is lessened eleven miles; and the short road of twelve miles, under a distinct Corporation, between New London and Norwich is avoided. The stock of the projected road is all subscribed, and it will be built in all the year 1851. It is, we believe, nearly decided that this Corporation shall have no equipage of its own, but that the New-York and New-Haven Road-shall run their equipage to Saybrook from the West and the Norwich and Worcester theirs to the same point from the East. When the Norfolk County Road is completed to the Norwich and Worcester, in Thompson, there will be a further saving of nineteen miles, making this the shortest land route between New-York and Boston, and forming very nearly a

The receipts at the Sub-Treasury are \$67,550. Payments, \$5,619. Balance, \$3,167,118. The balance in the Boston Sub-Treasury is about twoand a half millions. A half million was distributed among the Boston banks last week, by a nominal transfer from the Boston Sub-Treasury to that at New-York. The transfer was made in bills, and not in coin.

The accounts from the Ogdensburg Road contique to be favorable. It is doing a great business this month, for a new Road, and the receipts will be nearly or quite as large as the equipment at command can produce. Quantities of freight are accumulated at Ogdensburg. At a late date, 40,000 bbls, of Flour alone were in the permanent or transient warehouses of the Company, awaittendent has stated that the Canada business alone would support the Road. Canada this year is five or six millions of bushels sengers also, is considerable.

A few days since our Toronto correspondent noticed a project of Mr. Isaac Buchanan of Montreal, for the establishment of a line of Steamers between Glasgow and Montreal. Mr. Buchanan visited Portland the past week, the Advertiser says, with a view to ascertain the fitness of its harbor for a steamship terminus, and also the exact condition of the Railroad enterprises in which Portland capital is embarked, and especially as to the prospects of the Montreal road. In company with Mr. Poor, he went over the Atlantic road as far as Bacon Falls in Greenwood, sixty miles from Portland, and examined all the wharves and other localities in Portland and in the neighborhood. Mr. Buchanan sailed in the Africa from New-York on Wednesday, and will probably bring his scheme to the attention of the public the coming Winter. The plan is to construct three iron steamers of 1,600 tuns measurement, of the same general character as the steamer "Glasgow City," each steamer capable of carrying 6,000 barrels of flour or an equivalent amount of freight, with accommodations for seventy-five first-class and seventy-five second class passengers—the steamers to ran alternately from Glasgow to Portland and Montreal, till the completion of the Railroad, and after that to Portland direct. These steamers would cost about £30,000 each. Certain New-York houses propose to join in the carrying out of this scheme.

The subscriptions to the Conhocton Valley and Buffalo Railroad reach \$900,000 on the line of

Money is very abundant in Boston and paper is scarce. Stocks were advancing, and the specula-

tive spirit was active again.

The total indebtedness of North Carolina, as stated in Governor Manly's message to the Legislature, is \$3,520,052. This debt has been incurred mainly in the guarantee and indorsement of Bonds of the Railroad and other improvements throughout the State. The message says that the surplus in the Treasury, after the payment of the regular demands, this year, will be \$60,000, while the increased demands upon it for the year 1851 will be \$149,000, and for the year 1852 \$207,. 000, which is an excess over and above the whole amount that may be raised by the present revenue basis in 1851, of \$89,000, and in '52 of \$147,000. The Governor urges upon the Legislature to provide the means by an increase of taxation, to meet current liabilities, and at the same time create a sinking fund, and adds that "the temporising policy of borrowing money to pay interest will be disastrous to the State, will impair her credit, and may reduce her, sooner or later, to the ignominious and dishonest condition of re-

Mr. Bassinger, the Engineer of the Morris and Essex Railroad, has published a report of the survey of the proposed extension of that Road from its present terminus to the Delaware Water Gap. The line of the proposed extension will commence at Dover, where the present Road terminates, and passing through Stanhope and near Hackettstown, along the valleys of the Musconetcong, the Pequest and Beaver Brook, ends at the Water Gap. A branch can be constructed from the main line to Belvidere, distant only about two miles. At Waterloo, the line will connect with the Sussex Mine Railroad, running from that place to Newton. The distance from Dover to Belvidere, including the branch, is thirty-two miles the curves are represented as favorable, and the grade nowhere exceeds fifty feet per mile. It is estimated that the whole cost of the Road, including the equipment of the same, will not exceed \$800,000.

At Philadelphia, there is no material change to notice in the Money market. There is a good demand for money, but the banks and capitalists continue to discount freely, and the street rates for good short paper are but a trifle above the

There was a meeting of the mechanics and others of Lexington, Ky. on Saturday last. At this meeting a subscription of \$35,000 for the Maysville road was reported, and a resolution adopted approving of a vote by the citizens of Lexington and Fayette County, in favor of \$600, 000, to be equally divided between the three roads on the bond principle.
